

Policies for VID Consultations

Our interns will offer advice on the design, layout, color, wording, and other visual elements of your project. However, we are not experts in your field or class; therefore, we cannot advise you on the subject matter of your project. You are responsible for researching and developing the content of your project to ensure its validity. However, we are happy to advise on the visual elements!

VID Interns will:

- Advise on the design, layout, color, and/or wording of your project
- Talk through design ideas to allow you to brainstorm and create a design for your project
- Collaborate with you to strengthen your design
- Note items that may need clarification
- Assist with specific design software questions

VID Interns will not:

- Advise on the content/subject matter of the project
- Create the design or project for you
- Grade or evaluate the project
- Fact-check the project
- Teach how to use design software from start to finish
 - Instead, consult the Adobe Digital Studio:
<https://libraries.clemson.edu/creative-spaces/adobe-digital-studio/>
